Hi Kevin,

Thank you for the information. I didn't remember talking about it either.

Roger, do you know what the PFOA carbon changeout value is at Washington Works?

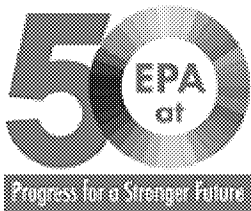

Thank you again,
Jenny

Jenny,

I'm not sure what the threshold is for when they change the carbon at the WW facility. I'm assuming they use **Ex. 5 Deliberative Process (DP)** I went back in my notes and I could only find where Andrew talked about what carbon they used, not the threshold for the changeout. The data for when they change it out seems to be inconsistent.

Thanks Jenny,

I forwarded the monitoring results to Rick Rogers who asked to review them - he has not gotten back to me yet. When he does I will inform Andrew Hartten of our position. H

Subject: FW: Bi-Weekly Sampling at Plant GAC Treatment

Hi Roger and Kevin,

I looked at the attached results for GenX at Washington Works and Roger,

Ex. 5 Deliberative Process (DP)

Ex. 5 Deliberative Process (DP)

Also, I was wondering if you two know what PFOA value Chemours uses as a carbon changeout requirement at Washington Works? Have we ever seen that? I am guessing they have a value after the lead bed?

Thank you,
Jenny

Subject: Bi-Weekly Sampling at Plant GAC Treatment

Hello Roger and Jenny,

Back in early 2018 when there were many questions concerning HFPO-DA and the like, we began monitoring the plant GAC Treatment system bi-weekly (i.e., PFOA and HFPO-DA). We have now been doing that for 24 months and have built a considerable database, and have gone through several carbon change outs documenting excellent treatment results.

I just wanted you to know that in May that we plan to go back to the normal "monthly" sampling we are required to do under the WV DOH permit for the treatment system.

Let me know if you see problems with this. We are trying to trim un-necessary costs in these tough economic times.

Thanks.....Andrew
